

Shamanic Energy Session

This session comes with a free 1 oz. nature/vibrational essence blend made just for you and delivered to you. These blends contain the live vibration of the natural substances, water, and vodka as a natural preservative. They are taken as drops in any beverage as needed to connect to the consciousness of the plants, crystals, etc. or daily/multiple times depending upon the intention of the blend and the person.

Nature is our teacher. At any time in our lives, we may look to nature to assist us toward a joyful, peaceful, abundant life. Much the same as when you hold a crystal and connect to its energy, all natural substances carry their own healing energy. Water stores frequencies; therefore, the frequency of any plant, flower, or any natural substance can be stored in water and consumed by us. This is an ancient technique for connecting with nature. When our vibration comes into contact with the vibration of the natural substance, we begin to attune to the vibration of it.

When you schedule this session, I will create a blend of nature essences that will be made specifically for you. During the session, we will connect to the spirits of the flowers, plants, crystals, elements, etc. in your blend and channel their energy for the session. Then you will reconnect daily or as needed to the natural substances by taking your essence blend in water or other drinks. Depending on how far out you schedule your appointment, your essence blend may arrive before or after our meeting.
