

# Golden Healing Light Attunement

And The Del Zarine (The Golden Hearted)  
Keepers of the Golden Healing Light

With Jen, Reiki Master Teacher

The Golden Healing Light is a high vibrational ancient Egyptian technology. Jen has been working with this healing energy in her own practice since December of 2024. The energy is a multidimensional frequency which can be used to accelerate the healing of physical and emotional wounds. Its future potential is of more than this description. In its highest form, it is communal as well. This is why the group, The Del Zarine (Keepers of the Golden Healing Light) has been established. Those who have been attuned will initiate the grounding and expansion of this light throughout the world and have the option to join this group (The Del Zarine) to heal together, to share their experiences in order to accumulate a knowledge base regarding the light's abilities and to support one another as anchors of this light.

After the attunement, the Golden Healing Light:

- Can be called in using its name, "I call in the Golden Healing Light."
- Should be used with the intention of the highest good of the recipient, with the recipient being already whole, healed
- Can be used for circle/group healing (amplifies the energy) when those working with the light intend to join hearts and place their intention upon one person while channeling the light
- Feels lighter, flows more easily, and is of a higher vibration than Usui Reiki energies (may not be as easy to "feel" in the hands)
- May bring in energies of past lives in Egypt, Atlantis, or other places.
- May bring in energies of ancient wisdom, spiritual assistance from Egyptian deities/spirits.
- May be used for anything you would use Usui Reiki energies for: clearing, charging, distance work, energetic alignment, clarity, connection to higher power, etc.
